

Green Star is Australasia's largest voluntary and truly holistic sustainability rating system for buildings, fitouts and communities. A Green Star certification proves that a project has met best practice sustainable design and build benchmarks set by the Green Building Council. Our products can help your project achieve a Green Star certification.

Green Star Buildings

Category	Credit	Criteria	Contribution of Autex Acoustics
Responsible	Responsible finishes	Responsible products value	<p>Certified to Global GreenTag GreenRate Level A, achieving a 100% mark for overall sustainability performance, including performance in terms of health and ecotoxicity, environmental impacts, and social responsibility.</p> <p>With Environmental Product Declarations (EPDs) that are product-specific, ISO 14025 and EN 15804 compliant, and contain information on the product's life cycle and environmental impacts. EPDs have been verified and critically reviewed by an external party, providing assurance that the life cycle information shown are accurate.</p>
	Light quality	Glare from light sources	Available in a wide range of colours and reflectance values, providing more flexibility when designing a space to achieve the required Unified Glare Rating (UGR).
	Acoustic comfort	Reverberation control	Highly sound absorptive products, reducing reverberation time, supporting concentration, and increasing speech intelligibility.
	Exposure to toxins	Part 1: Implement Sound Reducing Surfaces	Low VOC and formaldehyde emissions and will not contribute to poor indoor air quality.
Healthy	Connection to nature	Plants & nature-inspired design	Available in nature-inspired colours, with the option for customisations to create designs inspired by nature.
	Positive	Upfront carbon emissions	Reducing upfront carbon emissions
Places	Culture, heritage, and identity	Community led design response	Come with customisation options to create designs that celebrate culture, heritage, and identity.
People	Design for inclusion	Inclusive design	Come with customisation options to create inclusive designs that celebrate diversity.

Green Star - design and as built; interiors

Category	Credit	Criteria	Contribution of Autex Acoustics
Indoor environmental quality	Acoustic Comfort	Reverberation	Highly sound absorptive products, reducing reverberation time, supporting concentration, and increasing speech intelligibility.
		Lighting Comfort	Available in a wide range of colours and reflectance values, providing more flexibility when designing a space to achieve the required Unified Glare Rating (UGR) and illuminance.
	Materials	Sustainable Products	Recycled content products
Environmental product declarations			With Environmental Product Declarations (EPDs) that are product-specific, ISO 14025 and EN 15804 compliant, and contain information on the product's life cycle and environmental impacts. EPDs have been verified and critically reviewed by an external party, providing assurance that the life cycle information shown are accurate.
Third-party certification			Certified to Global GreenTag GreenRate Level A, achieving a 100% mark for overall sustainability performance, including performance in terms of health and ecotoxicity, environmental impacts, and social responsibility.
Innovation	Innovation	Improving on Green Star benchmarks	May contribute to additional points if there is a higher percentage of sustainable products used in the project.
