

The US Green Building Council is committed to transforming how buildings are designed, constructed and operated through LEED. LEED is the most widely used green building rating system in the world, providing a framework for healthy, highly efficient, and cost-saving green buildings, and offering a globally recognised symbol of sustainability achievement through the LEED certification. Our products can help your project achieve a LEED certification.

LEED

Concept	Credit	Option	Contribution of Autex Acoustics
Materials and resources	Environmental Product Declarations	Option 1. Environmental Product Declaration (EPD)	With Environmental Product Declarations (EPDs) that are product-specific, ISO 14025 and EN 15804 compliant, and contain information on the product's life cycle and environmental impacts. EPDs have been verified and critically reviewed by an external party, providing assurance that the life cycle information shown are accurate.
	Sourcing of raw materials	Responsible sourcing of raw materials	Made of 100% PET, a portion of which is post-consumer recycled PET (from PET bottle flakes).
	Material ingredients		Option 1. Material Ingredient Reporting
Option 2. Material ingredient optimization			Declare labels are third-party verified, which gives assurance that the information disclosed is true and accurate.
Indoor environmental quality	Low-emitting materials	VOC emissions evaluation	Low VOC and formaldehyde emissions and will not contribute to poor indoor air quality.
	Interior lighting	Glare control	Available in a wide range of colours and reflectance values, providing more flexibility when designing a space to achieve the required Unified Glare Rating (UGR).
	Acoustic performance	Reverberation time	Highly sound absorptive products, reducing reverberation time, supporting concentration, and increasing speech intelligibility.
